PROFESSIONAL SUMMARY

With a background in transnational litigation and corporate & finance law studies in the Netherlands, I gained practical experience through internships. At a Singapore law firm, I delved into legal research, case analysis, and managed cross-border cases, enhancing communication with attorneys and clients.

Later, at a satellite company's in-house counselling department, I focused on contract drafting, compliance assessments, and debt restructuring initiatives. These experiences instilled a passion for contributing to the global community, fostering adaptability, and nurturing a collaborative approach for positive impact within the legal profession.
